Mohammed Ibrahim Hassan

Senior Mobile Developer — Flutter • Swift • Kotlin • Full-Stack (Spring Boot)

Lagos, Nigeria | mohammedibrahim075@gmail.com | +234 706 050 6055 | linkedin.com/in/ibrahim-mohammed-67735a166 | github.com/masteribro

PROFESSIONAL SUMMARY

Senior Mobile Developer with **5+ years of production experience** shipping high-performance Android and iOS applications using **Flutter and Dart** for cross-platform delivery, with native development capability in **Swift (iOS) and Kotlin (Android)** and **full-stack capability in Java and Spring Boot**. Track record of delivering complex apps live on the **Apple App Store and Google Play Store** across **fintech, healthcare, ride-hailing, e-commerce, and social networking** — including a 4.8-star multi-bank fintech aggregator and a HIPAA-conscious telemedicine platform. Experienced in offline-first architecture, real-time geospatial systems, secure payment integrations, and CI/CD-driven release pipelines. Known for clean, maintainable code, sprint discipline, and consistently exceeding client expectations.

TECHNICAL SKILLS

Cross-Platform Mobile: Flutter, Dart

Native iOS: Swift, SwiftUI

Native Android: Kotlin, Java

State Management: Bloc / Cubit, Riverpod, Provider, Stacked MVVM

Backend Development: Java, Spring Boot, Spring Data JPA, JWT, REST APIs, WebSockets

Cloud & Realtime: Firebase, Twilio Video, Agora, Jitsi, ZegoCloud, WebRTC

Payment Integration: Paystack, Flutterwave, Stripe, In-App Purchases

Maps & Geospatial: Google Maps API, real-time geolocation, route optimization

Connectivity: Bluetooth (BLE), NFC, Offline-first architecture, Background Sync

Security & Auth: Biometric Authentication, OAuth 2.0, JWT, Secure Storage

DevOps & Tools: Git, CI/CD (Codemagic), Jira, Asana, Figma

Architecture: MVVM, Clean Architecture, Repository pattern, Platform Channels

Other Languages: Python and JavaScript

PROFESSIONAL EXPERIENCE

Cruz — Flutter Mobile Developer

Jan 2025 – Present

Ride-Hailing Platform • Lagos, Nigeria • Published on Apple App Store & Google Play Store

- Integrated **Google Maps API** for live ride tracking, real-time geolocation, and route optimization, improving dispatch accuracy and rider experience.
- Engineered real-time ride matching, fare estimation, and request management using **WebSockets and Firebase**, reducing system latency by a significant margin.
- Built and maintained separate **Driver and Rider Flutter apps** using Bloc state management, resulting in measurably improved app stability and reduced crash rates.
- Integrated **Paystack payment gateway** for seamless fare transactions, boosting transaction success rates and user trust.
- Performed app performance optimization (lazy loading, widget rebuilds, image caching), achieving faster ride booking flows and improved Play Store ratings.
- Collaborated with backend engineers and designers to ship new features within sprint deadlines using Jira and Git branching workflows.

Moneta Technology — Flutter Mobile Developer
Sept 2022 – Dec 2024

Financial Technology Company • Abuja, Nigeria • Multiple apps published on Apple App Store & Google Play Store

- Led core feature development on the **Moneta POS application** — designing and implementing the full UI/UX from Figma to pixel-perfect code, building invoice payment flows, transaction history, and analytics dashboards that drove improved transaction efficiency.
- Contributed to the **Moneta Mobile App** — a fintech aggregator enabling multi-bank account aggregation, money transfers, utility bill payments, merchant payment links, and QR code generation, currently rated 4.8 stars on the App Store.
- Spearheaded end-to-end development of the **Regent Microfinance Bank App** — account creation, fund transfers, savings management, and biometric authentication — published on both major app stores.
- Implemented **inter- and intra-bank fund transfer** features in the UniAbuja MFB app, enhancing transaction accuracy and reducing processing time.
- Applied **secure coding practices** (biometric auth, encrypted storage, token management) across all fintech products to ensure regulatory compliance and user data safety.

Dreamlab Nigeria Limited — Flutter Mobile Developer
Jan 2021 – Aug 2022

Software Development Company • Nigeria

- Developed **Fanect**, a social media application with live streaming, user feeds, and real-time engagement features using Flutter and Firebase.
- Built **Myride**, a ride-booking app with Google Maps API integration, real-time matching, and Firebase-powered chat and fare estimation.
- Gained deep expertise in **Flutter Bloc state management**, clean architecture, and scalable project structuring across multiple concurrent products.

NOTABLE PROJECTS

PayMesh — Offline-First Peer-to-Peer Wallet (Full-Stack) [Open Source]

Flutter • Dart • Bluetooth (BLE) • NFC • Java • Spring Boot • Spring Data JPA • JWT • Merkle Tree Sync

- Architected and built an **offline-first Flutter wallet** enabling peer-to-peer payments via **Bluetooth and NFC** with no internet required at point of transfer — purpose-built for low-connectivity environments common across Africa and emerging markets.
- Implemented **local transaction storage with automatic background sync** once connectivity is restored, ensuring zero data loss; enforced per-user offline spending limits and Merkle-root integrity checks to prevent fraud.
- Engineered BLE/NFC device discovery, secure pairing, and an **encrypted transfer protocol**, solving a critical payment gap for underserved markets.
- Built **paymesh-backend** — a Java **Spring Boot REST API** powering the wallet — implementing **JWT-based authentication**, peer-to-peer online money transfers, offline transaction sync with Merkle-root integrity verification, and transaction history persistence with Spring Data JPA.

ImaniHealth — Healthcare Telemedicine Platform [Published: iOS & Android]

Flutter • Native Swift & Kotlin (Platform Channels) • Twilio Video SDK • Firebase • Wallet Payments

- Delivered a HIPAA-conscious telemedicine platform enabling patients to **consult certified doctors via HD video calls** 24/7, access electronic medical records, and manage prescriptions digitally.
- Implemented the **video consultation feature using native Swift (iOS) and Kotlin (Android)** with the Twilio Video SDK, exposing it to Flutter via a custom **platform channel wrapper** — delivering reliable, low-latency virtual appointments where pure Flutter packages fell short.
- Implemented **secure electronic health records (EHR) management**, lab results viewing, appointment scheduling, and dependent profile support.

- Integrated an in-app **wallet and payment system** for seamless consultation fee processing.
- Built real-time vital sign and symptom tracking dashboards to support proactive patient health management.

Tickvent — Event Management & Ticketing Platform [Open Source]

Flutter • Stacked MVVM • Firebase (Auth, Firestore, Storage) • QR Tickets • Push Notifications

- Full-featured event management app for the Nigerian market with two roles (**Attendee and Host**), event creation, QR-code ticketing, in-app notifications, Google Sign-In, and biometric authentication.
- Implemented **deep-linking from notifications** to event detail screens and a featured-events algorithm based on attendee count.
- Architected with **Stacked MVVM** for scalability and clear separation of concerns; integrated Firebase Firestore for real-time event data and Firebase Storage for media assets.

GitHub: github.com/masteribro/tickvent-mobile

Cruz — Ride-Hailing App (Driver & Passenger) [Published: iOS & Android]

Flutter • Bloc • Firebase • Google Maps API • WebSockets • Paystack

- Two separate applications (driver + passenger) covering real-time tracking, fare estimation, ride booking, and secure in-app payments.

Driver iOS: apps.apple.com/ng/app/cruz-driver-drive-deliver/id6736481080 | Passenger iOS: apps.apple.com/ng/app/cruz-ride-with-cruz/id6736480995

Driver Android: play.google.com/store/apps/details?id=com.cruztech.driver.app | Passenger Android: play.google.com/store/apps/details?id=com.cruztech.passenger.app

Moneta — Multi-Bank Fintech Aggregator [Published: iOS & Android • 4.8★]

Flutter • Bloc • Firebase • Biometric Auth • Banking APIs • QR Payments • Savings

- Multi-bank aggregator letting users connect all bank accounts in one place, monitor balances, and track transactions — with biometric security, encrypted storage, and inter-/intra-bank transfers.
- Built merchant tools including **customizable payment links and QR code generation** for businesses to accept direct bank payments, alongside transaction analytics dashboards.
- Implemented **savings accounts with interest rates** and cooperative-society integration; the app maintains a 4.8-star App Store rating.

App Store: apps.apple.com/ng/app/moneta/id6446173062 | Play Store: play.google.com/store/apps/details?id=com.dreamlabs.moneta

YourWay — On-Demand Home Services Booking [Published: iOS & Android]

Flutter • Riverpod • Firebase • Paystack • Real-time Chat

- On-demand service booking platform connecting customers with verified service providers, featuring real-time chat, ratings, and secure payment processing.

App Store: apps.apple.com/us/app/yourway-your-service-hub/id6744569494 | Play Store: play.google.com/store/apps/details?id=com.yourwayapp.services

Artisan — Skilled Trades Marketplace [Published: Android]

Flutter • Firebase • Flutterwave • Biometric Auth • In-app Chat

- Marketplace connecting artisans and customers with integrated chat, Flutterwave payments, biometric login, and account resolution.

Play Store: play.google.com/store/apps/details?id=com.leye.artisan

Relate Network — Social & E-Wallet Super App

Flutter • Stacked Architecture • WebSockets • Agora • e-Wallet

- Comprehensive super-app combining social networking, instant messaging, video/audio calls, and an integrated e-wallet, built with Stacked Architecture for modularity and scalability.

EDUCATION

Miva University — Nigeria Ongoing
Master's, Information Technology

Kwara State University — Malete, Kwara State 2017
B.Sc. Biochemistry

University of Ilorin Secondary School — Ilorin, Kwara State 2012
Senior School Certificate Examination (SSCE)

PROFESSIONAL CERTIFICATIONS

Flutter & Dart — The Complete Guide (Udemy) 2023
Computational Thinking (Coursera) 2023
Flutter: Powering Your App with Live Web Data (LinkedIn Learning) 2022
Responsive Web Design (freeCodeCamp) 2020

INTERESTS

Open-source contribution • Mobile UX research • Playing tennis • Reading & researching technology trends • Travelling
